Dear Customer,

We source used printing and converting machines and supply them to customers throughout the world . We work in the international area, so in our machine database which holds the list of the used printing machinery and equipment , our customers can find and ask any kind of printing machines from anywhere in the world .

Our headquarter is in ARAD, Romania but we also have representative branches in Italy ,United Kingdom, Latin America and Asia . In Italy we also have a Project department office with project engineers, specialized mechanic and electronic engineers with more than 30 years experience on converting machines.

- *Total service package
- *Expertise in converting equipment
- *Breakdown callout
- *Ongoing maintenance
- *Covering all areas: Electrical, Mechanical, Electronic, Pneumatic, Hydraulic, Project
- *Replacement and maintenance parts , installation, dismantling, contractors

All along these years Acfer Service has been followed the path of technological growth, trying to find always new solutions for the different needs becoming an up to date future-oriented company.

Our organization is made by a great team of technicians with good experience from companies like Rotomec, Cerutti, Uteco, MRG Grafomac , Nordmeccanica, Colines, Prandi, Andreotti, Polytype and others .

Acfer Service Srl

Service

2

We made installations all around the world and we continue without limits.

We operate on rotogravure presses, flexopress, extrusion coating laminating lines, slitter, stretch film and cast , metallizers, mechanical, electrical , electronic and software services.

We also supply modifications on existing machines where we may add new or used unwinder & rewinder, printing units, printing cylinders trolley, solvent less trolley, mechanical & electronic projects, refurbishing and any other request for any kind of equipments utilized to print on any material.

Used machines can be modified and integrated with other customized systems or solutions to build the plant that meets the customer's specific needs.

Our company guarantees an excellent after sales and spare parts service and we have collaborators who work with converting machines since more than twenty years.

After the installation and start up, maintenance contracts are available specifically designed for the individual customer.

We are also interested to know if you have an used equipment for sale, in this case, please, send us all details and photo to our email address.

Packaging, loading and shipping

Proper packaging will protect equipment during long haul sea transport and can allow a more efficient use of space inside containers.

We can supply crates for “out of gauge” items, barrier sack to protect from corrosion and wooden platforms and structure to safely fix items inside containers.

We also have great cooperation with most of the biggest shippers around the world and we can provide a full service for Customs.

Retrofits

Thank to our team we can execute necessary modifications to better fit customer’s requests and applications.

Renovation

In our workshop we are capable to recondition run-down equipment and turn it into a completely functional reconditioned unit.

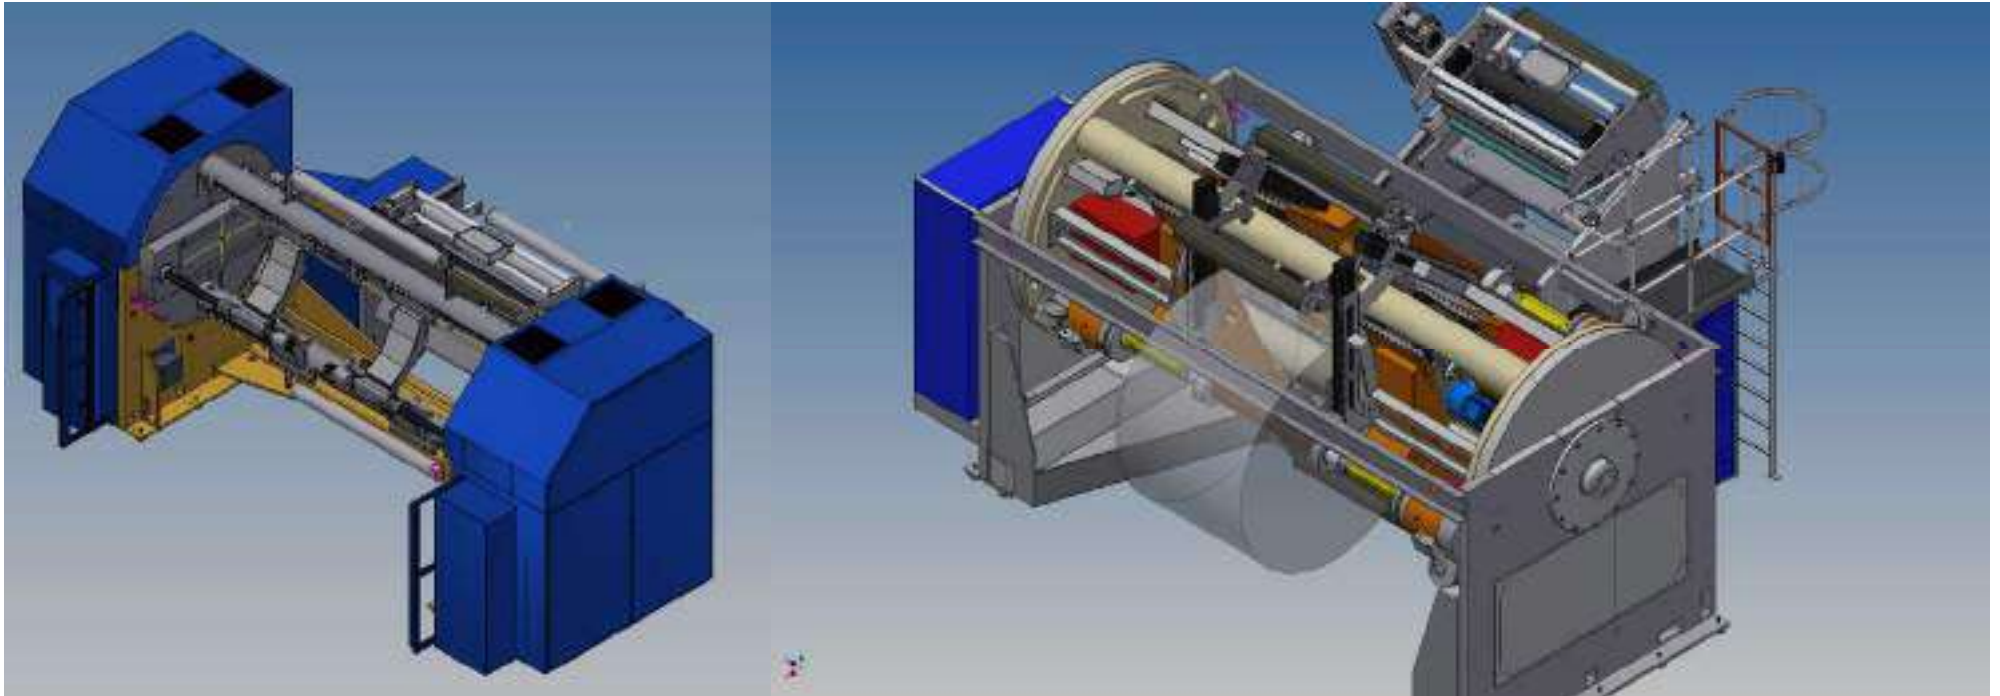

Also controls can be modernized installing new digital drive and PLC or we may supply a brand new electrical cabinet with the last technology for your machine.

- Printing machines, flexopress and rotogravure
- Extrusion coating laminating
- Slitter rewinder
- Coating and lamination machines
- others.....

Printing system and coating on trolley

Printing system and coating

Acfer Service Srl

our European partners

Strategy: Efficiency

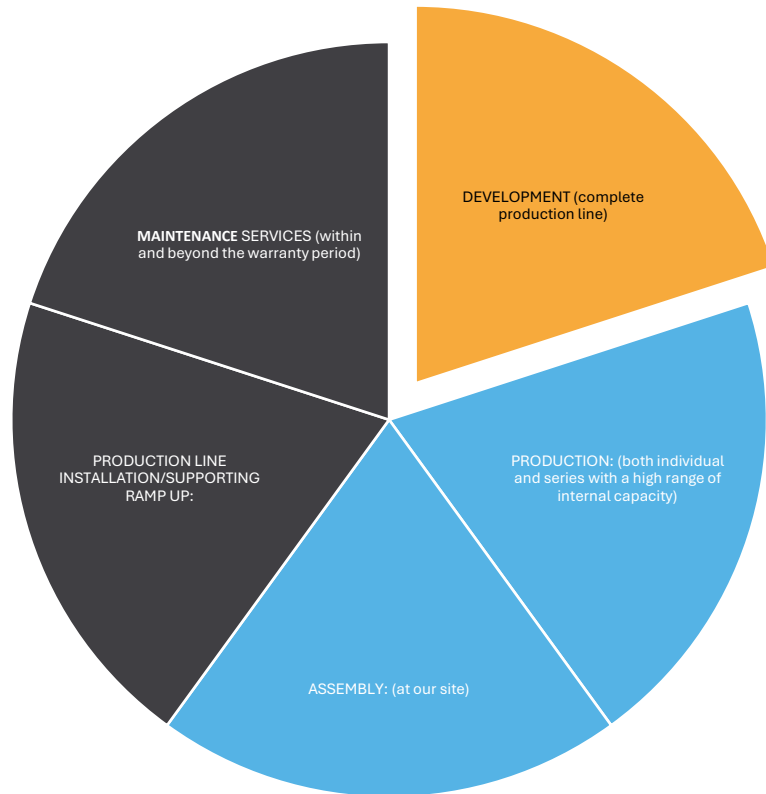

- According to customer demand and request
- Cost efficiency (preplanning, controlling etc) through long time experience with special machine building
- Multidisciplinary organization:
 - special machine building,
 - serial production,
 - maintenance as service etc.

Our Capabilities

Lifecycle Managemet:

With 20 years of experience, we provide the design and full implementation of complete production lines and individual production cells in manual, semi-automatic, and fully automated designs.

DEVELOPMENT (complete production line)

- Mechanical design
- Electrical design
- PLC programming
- Project management
- Quality management (PFMA)
- Procurement management (integration of robots, manipulators, vision systems ... etc.)

PRODUCTION: (both individual and series with a high range of internal capacity)

- Purchasing (raw material, commercial component)
- CNC milling
- CNC turning
- Structure production and Welding EN ISO 3834-2:2021
- Painting

ASSEMBLY: (at our site)

- Mechanical assembly
- Electrical assembly
- Customer visit and final acceptance (visit guaranteed at any time during our project)

PRODUCTION LINE INSTALLATION/SUPPORTING RAMP UP:

- Installation and commissioning of complete production lines or production cells at the customer's site
- Continuous supporting ramp up phrase to ensure customer requirement (for example: cycle time, process capability, OEE... etc.)

MAINTENANCE SERVICES (within and beyond the warranty period)

- Spare parts
- Preventive maintenance (based on contract)
- Line relocation, renewing, speedup ... etc.

Experience - Serial production

Serial production

- Significant machine park
- More than 20 years of production experience
- Flexible ERP System with capacity planning
- Technologies: (inhouse)
 - Machining
 - Welding
 - Assembly and mounting
- Flexible customizable area for welding and assembly processes

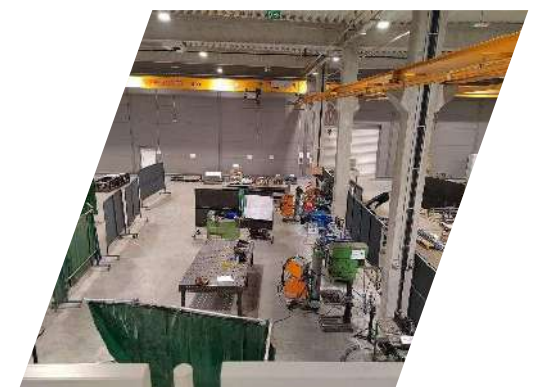

Complete Quality Planning

- P-FMEA (if required)
- Process Flow Chart
- Control plan (PLP/CP)
- Inspection plans, work instructions, etc.

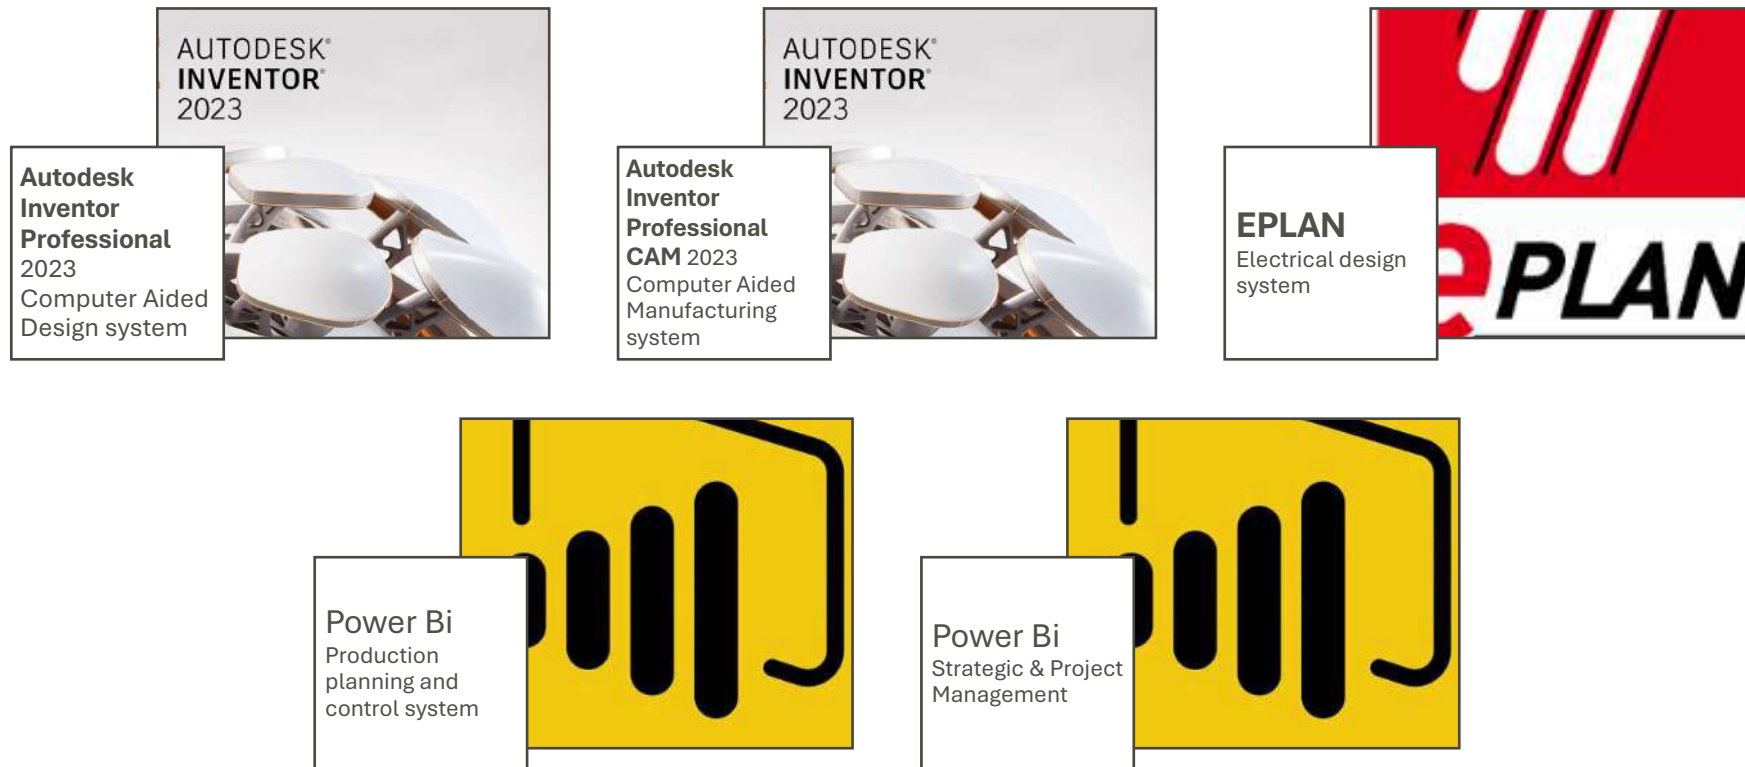

First sampling

- Acc. to customer 's requirement (PPAP/VDA)
- Requalification (yearly)

Used Software

Machine park

11pcs CNC milling M/C
5pcs conventionelle miling

5pcs CNC Turning M/C
4pcs conv. Turning M/C

1pcs CNC Plate bender

1pcs CNC plate shear
M/C

1pcs profil roller

1pcs Robot cell

4pcs Siegmund welding
tables

23pcs Rehm etc.
welding M/C

1pcs Flame cutter

1pcs sectional 10m
painting cabin
